PROFESSIONAL SUMMARY

Detail-oriented Junior Fullstack Developer with a BSc (Hons) in Computer Systems Engineering. Currently specializing in Java Spring Boot at LACONIC. Proven ability to optimize automate complex data workflows. Highly motivated to contribute to international tech teams in Bangkok. Professional proficiency in English.

Selected Experience

Backend Developer | Thailand Jun 2026 – Present
Laconic

- Architecting and maintaining Crabonic, an event registration platform featuring dedicated portals for organisers and participants using Java Spring Boot.
- Developed the frontend components using React.js to improve user engagement and interface responsiveness.
- Engineered a data synchronisation bridge between Jobonic and Mosonic, automating entry and saving 15 manual hours per week.
- Tuned Oracle DB schemas and SQL queries, resulting in a 40% increase in system throughput during peak traffic.

Technical Internship (Early Foundation) | Myanmar 2015 (3 Months)
MIT Software Solution

- Gained foundational exposure to Java-based application development and bug-fixing processes.
- Assisted senior developers in troubleshooting application functionality and requirement gathering.

Education

BSc (Hons) Computer Systems Engineering Graduated 2025
University of Sunderland (via Gusto University)

Technical Skills

Languages Java TypeScript JavaScript C# HTML5/CSS3

Frontend Angular React.js

Backend Spring Framework .NET

Database Oracle MySQL Microsoft SQL

Project Experience

- Clinic Booking System — JavaFX
- Designed and developed a desktop booking application for a non-profit clinic (F.F.S.S.).
 - Created a streamlined workflow focused on usability for non-technical clinic staff.
 - Successfully donated and deployed the application for real-world medical use.

Bookstore Web Application

- Built a responsive web-based scheduling system.
- Developed the frontend using Angular and implemented backend logic using Java Spring.
- Integrated shopping cart and purchasing logic in project.

Awards and Hackathons

Participant – MaePaySoh Hack Challenge (2015): Collaborated in a team to build an election guide application under strict time constraints.
